AF

DISC PLOW

The model **AF Disc Plow** is designed for extra strength and offers a wide range of adjustments that permit efficient operation under all types of field and soil conditions. It is well suited for sugar cane stubble and similar crops that leave a high concentration of crop residues.

- Heavy duty frame;
- Category I or II brackets for universal three point lift;
- Adjustments to control width of cut and depth of penetration;
- Disc blades and furrow wheel mounted on regreasable hubs, double row, tapered roller bearings;
- Adjustable furrow wheel and cross-shaft;
- Equipped with parking stand.

Optional Equipment
Adjustable depth control wheel (gauge wheel).
