TSTA

LEVEE TERRACING PLOW

Building an average 600 – 800 meters of terrace per hour, the use of TSTA allows to keep the fertile layer of soil with total area usage for planting.

FEATURES

- High resistance structure.
- Less weight and more versatility in the operations.
- The tapered disc blades to the terrace elevation, as well as the transport wheel activation are done by double action hydraulic cylinders with precise movements which are hydraulically controlled from the tractor driver's seat.
- Pulled by drawbar, leaving the three point hitch free.
- The wheel system with two 750 x 16 tyres, making the transport and manoeuvring easier also when controlling the working depth.
- Disc gangs with oil bath bearings or greasable bearings.
- Floating guide wheel that absorbs the side shocks keeping the implement to the right alignment.

Tapered roller bearings
and Duo-Cone seals.

Special oil bath bearings.

THE LIFE OF YOUR DISK HARROW
REQUIRES ORIGINAL TATU REPLACEMENT PARTS.

Tatu bearing assemblies with roller bearings, grease lubricated (CM) or in permanent oil lubrication - DUROMARK® (DM).
