

T²SI

ROW CROP PLANTER

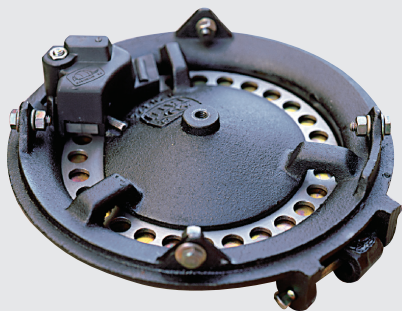

THE BRAND OF THE LAND

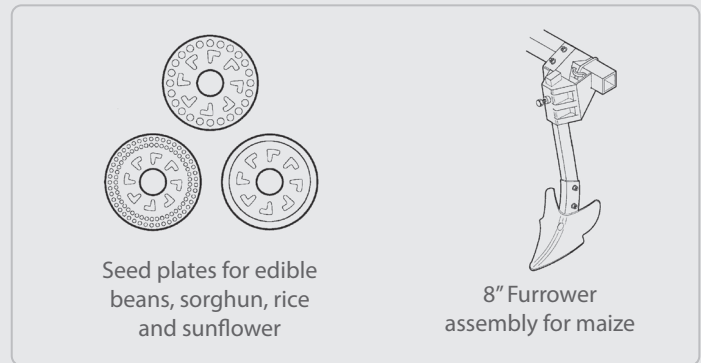

The model T²SI - Row Crop Planter, features quality, efficiency, low cost, easy operation and reduced maintenance. It performs conventional planting of maize, soybeans, edible beans, rice, sorghun, delinted cotton, etc. The clean design and simplicity will assure performance in most soils and conditions.

Fertilizer Metering: auger type covered with PVC for precision and uniformity over the whole field.

Standard seed plates supplied with each machine. One set for maize, one set for soybean and one set for blanks to be drilled as per farmer's needs.

Special Features:

- Shorter rows.
- Polyethylene hoppers for corrosion resistance.
- Fertilizer system mounted on the frame.
- Easy operation markers.
- Adjustable row spacing.
- Simple adjustments for varying quantities and better placement of seed and fertilizer in the soil.
- Depth control wheels.
- Supplied with industrial roller chain.
